

Raul Souza Silva

Full Stack Software Engineer | React, TypeScript, Next.js, Node.js | AI-enabled Applications

Brazil • raulsscoc@hotmail.com • +55 16 99624-6365

linkedin.com/in/lilrau • github.com/lilrau • raul.moonrock.com.br

Summary

Full Stack Engineer focused on building scalable web applications and AI-enabled product experiences.

Experienced in designing and delivering end-to-end solutions across frontend, backend, and infrastructure using React, Next.js, TypeScript, Node.js, and PostgreSQL. Built recommendation systems, automation workflows, internal platforms, and customer-facing products, taking features from concept to production while contributing to technical decisions and system architecture.

Passionate about working close to product teams, understanding user problems, and building reliable software that creates measurable impact.

Experience

Amazoca by Lugenius
Full Stack Software Engineer
Junior Developer

Remote, Brazil
Jan 2026 – Present
Oct 2025 – Dec 2025

- Owned architectural decisions and contributed to frontend and backend evolution in collaboration with product and engineering teams.
- Scaled the platform to **175+ REST API endpoints** across **20 backend modules** and **24 frontend feature domains** using React, Next.js, NestJS, PostgreSQL, and TypeScript.
- Improved critical database query performance from **380ms** to **~140ms** (**~63% reduction**) through indexing strategies, eager loading, and TypeORM optimization.
- Increased automated test coverage from **~15%** to **~72%** by implementing **200+ unit and integration tests** using Vitest and Jest.
- Built AI-driven product features and transactional workflows, including persistent chat, recommendation systems, payment flows, reservations, and onboarding experiences with real-time communication.
- Established CI/CD workflows using GitHub Actions, Render, Vercel, and Cloudflare, enabling **~5 deployments per week** while reducing infrastructure costs by **~6%**.

AquiCob
Software Engineer — Automation and AI

Ponta Grossa, Brazil
Jun 2024 – Aug 2025

- Developed AI-assisted customer service workflows for a debt collection CRM used by **100+ internal operators**.
- Automated operational processes through n8n workflows and API integrations involving WhatsApp Cloud API, Chatwoot, and financial platforms, reducing first response time to **~40 seconds**.
- Designed intelligent negotiation workflows that increased WhatsApp response rates by **~23%** while reducing repetitive manual tasks.

MoonRock Tech Solutions
Software Engineer & Co-founder

Remote, Brazil
Sep 2023 – Present

- Co-founded a software studio focused on building B2B and B2C web platforms and custom software solutions.
- Built EduSaaS, a multi-tenant education management platform using Laravel, React, Inertia.js, PostgreSQL, Redis, and Cloudflare R2, with **60+ domain models**.
- Developed Hi: Agenda e Gestão using NestJS, Prisma, React, and Vite, including **47 Prisma models** and automated testing infrastructure.
- Led system architecture, database design, deployment processes, and technical decisions, reducing build time from **~8 minutes** to **~3 minutes**.

Projects

BootStack
Open Source Tool

Personal Project

- Web tool for regenerating Linux environments across different package managers (APT, Pacman, DNF, Zypper, APK), supporting setup export/import through JSON.
- Built with Next.js, TypeScript, and Radix UI.

UTFPR × UNESP
Volunteer Student

Academic Project Management Platform
Feb 2024 – Jun 2024

- Developed an academic project management platform with onboarding, skill mapping, project allocation, and KPI tracking.
- Implemented an allocation algorithm based on Euclidean distance to match student skills with project requirements.
- Technology stack: Python, .NET, React, Docker, following the MEI-U methodology from UTFPR.

Technical Skills

- Languages: TypeScript, JavaScript, Python, PHP, SQL
- Frontend: React, Next.js, TailwindCSS, shadcn/ui, Inertia.js, Vite
- Backend: Node.js, NestJS, Laravel, REST APIs, PostgreSQL, Prisma, TypeORM
- AI Engineering: LLM integrations, AI agents, chatbots, recommendation systems, vector databases
- Infrastructure: Docker, GitHub Actions, Vercel, Render, Cloudflare, Coolify, AWS S3
- Tools: Git, n8n, Jira
- Languages: Portuguese (Native), English (C1 Advanced)

Education

Federal University of Technology – Paraná (UTFPR)
Technology Degree in Systems Analysis and Development

Ponta Grossa, Brazil
2024 – 2025

Federal University of Technology – Paraná (UTFPR)
Bachelor's Degree in Computer Science (Transferred to Systems Analysis and Development)

Ponta Grossa, Brazil
2021 – 2023

Certifications

- C1 Advanced English Certificate — EF SET
- Artificial Intelligence and Advanced Data Science Tools Course — Mackenzie Presbyterian University
